INFORMATION ABOUT THE SPECIAL ISSUE:

Adventure tourism is a niche market that has been gaining importance over the last couple of years within new tourist practises. More and more people are looking for adventure and excitement, and with that experiences and stories to tell, while on holiday. Nature, Culture and physical activities are three important pillars of adventure tourism. It brings together travel, sport and outdoor recreation. Activities have components of risk, uncertainty, danger, novelty, challenge, excitement, escapism, stimulation, absorption, and contrasting emotions. Thereby the tourist is provided with relatively high levels of sensory stimulation. This adds up to the special experiences of adventure travel that attract more and more people between 20 and 50 years of age, who are willing to spend money on their trips. Especially developing countries can profit from this form of tourism as adventure travellers do not need special infrastructure. They bring money to poorer areas and push sustainable development. Adventure tourism is closely linked with sustainable tourism, as well as slow tourism. Especially soft adventure activities are important aspects of slow tourist experiences. With the rising demand for adventure travel comes an interest in academic portrayal of the topic. Over the last years more and more research has been done in the field of adventure and this special issue seeks to broaden the reach of this interesting and purposeful research.

Areas of interest include the following:

- Adventure tourism development
- Adventure travellers
- Sustainable adventure tourism
- Adventure Travel and Well-being and health
- Adventure tourism in developing countries
- Tourist experiences in adventure travel
- Sharing economy and adventure tourism
- Experience economy and adventure tourism
- Slow tourism

About The Journal

TOURISM SPECTRUM is a refereed social sciences international journal focusing on the academic and research perspectives of tourism and hospitality. While striving for a balance of theory and application, Tourism Spectrum seeks to develop theoretical constructs. To enrich the discipline of tourism, it encourages offerings from various disciplines; to serve as a forum through which the disciplines may interact; and thus to expand spectrum of knowledge and contribute to the literature on tourism social science. In this role, TOURISM SPECTRUM structures and is structured by the research efforts of a multidisciplinary community of scholars.

The Journal is published twice a year (September & March) and features manuscripts dealing with various aspects of contemporary tourism and hospitality issues. Emphasizing an integrated approach to tourism in terms of tourism being an inter-disciplinary field, the journal focuses on various aspects of tourism and hospitality on the local, regional and global levels.

In addition to research papers, TOURISM SPECTRUM also publishes Research Notes (RN). RNs are short papers which may include an overlooked thought or add a question mark to some findings (this might be challenging or supporting ongoing research concepts and methods; dealing with untested propositions or hypotheses; importing and applying to tourism new models and tools from other fields; promoting multidisciplinary investigation in tourism; reporting or updating on-going longitudinal research; raising issues for debate and

investigation; identifying research questions applicable to the industry). Typically, the author(s) should identify a particular theme or issue that they would like to draw to the attention of the research community and develop a short piece specifically on this. The essence lies in the flow and in the convincing statement of cutting edge questions and answers/suggestions for future research.

In addition to this, the journal also publishes Conference Reports, Research Reports, Book Reviews or any other major happenings of the tourism world in its different columns. If a debate arises on any submission or reviewers and authors convincingly disagree; that may also be published to present dialectic viewpoints on a topic of universal interest in the discipline.

All papers will be anonymously reviewed by at least two reviewers. The selection for publication will be made on the basis of these reviews.
